Description	Frequency	Severity	Impact	Mitigation
1. Low Data Accuracy: Inaccurate data collection or reporting can lead to flawed analysis and decision-making.	Frequency: High	Severity: Medium	Impact: High	Mitigation: Implement data validation protocols, use multiple data sources, and ensure data integrity.
2. Overfitting: Creating a model that is too closely tailored to a specific dataset, leading to poor performance on new, unseen data.	Frequency: Medium	Severity: High	Impact: Medium	Mitigation: Use cross-validation, regularization techniques, and test the model on a separate dataset.
3. Model Bias: The model's predictions are systematically skewed due to biases in the training data or the model's assumptions.	Frequency: Medium	Severity: High	Impact: Medium	Mitigation: Identify and address biases in the training data, use diverse data sources, and consider alternative model assumptions.
4. Overfitting: Creating a model that is too closely tailored to a specific dataset, leading to poor performance on new, unseen data.	Frequency: Medium	Severity: High	Impact: Medium	Mitigation: Use cross-validation, regularization techniques, and test the model on a separate dataset.
5. Model Bias: The model's predictions are systematically skewed due to biases in the training data or the model's assumptions.	Frequency: Medium	Severity: High	Impact: Medium	Mitigation: Identify and address biases in the training data, use diverse data sources, and consider alternative model assumptions.
